If

The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance of the claims are the submission of a Terminal Disclaimer and inclusion of an acicular particle having a mean diameter ranging from 5-300 nm as nonmagnetic particles in the backcoat coupled with water-soluble cations equal or less than 100 parts per million and water-soluble anions in a quantity of equal to or less than 150 parts per million. These have been demonstrated to result in unobvious low surface roughness (Ra) and coefficient of friction (μ) with no precipitation on storage as demonstrated in the examples summarized in instant Table 2 for instant 'embodiment' 1, 2, and 3 as contrasted with prior art comparative examples 1 and 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

The claims are 1 to 10.

- All claims have been allowed.
